Inventors Look to Turn Creations to Cash

By ERICA BULMAN 04.20.07, 10:49 AM ET

The PAP Ion Magnetic Inductor - also known as the Papimi - claims to increase the efficiency of the body on a cellular level through rapid electromagnetic pulses, and thus relieve pain. Austrian promoter Gernot Augustin also says he cured his mother of breast cancer with the apparatus.

A 75-member jury will select the best invention and award prizes in 45 other categories on Sunday. The "Oscar of Inventions" is also awarded on the basis of a popular vote from visitors.
