

CONTENTS.

| Chapter. | Page. |
|--|-------|
| I. Definition of High Frequency Current; Alternation; Cycle; Period; Oscillation; Frequency; Lighting Vacuum Tube Not Proof of High Frequency Current. | 13 |
| II. The Development of the Current; Leyden Jars; Plate Condensers; Electrical Oscillation. | 22 |
| III. Types of Apparatus; D'Arsonval Type Tesla Transformer; Impedance; Oudin's Resonator; Measuring the Current. | 30 |
| IV. Various Forms of Vacuum Tubes; Effects of Different Vacua; Insulated Tubes; Fixed and Adjustable Socket Handles; Spatulate Tubes. | 45 |
